

Buffalo-Bowie (Buchloe dactyloides)

Technical Sheet

Bowie™ Buffalograss is a warm season grass which meets all of today's standards for a low maintenance turfgrass.

It possesses medium green color, fine leaf texture, good turf density, and a low growth habit.

Bowie™ has improved color and height uniformity, lateral growth for quicker establishment, winter hardiness, and spring green up.

It will not grow well in the shade as it needs 6-8 hours of sunshine with morning sun being the most critical.

It can provide food for wildlife.

Seeding Rate

Solid stand of a single specie

Per 1,000 sq. ft.

1-2 lb.

Per Acre

90 - 130 lb.

Characteristics

Sun Exposure: Full Sun

Height: 6" - 1 feet

Root Depth: 12" minimum

Blooms: Late Summer

Soil: Wide range

High Drought tolerance

High salt tolerance
