

If you can't settle for anything but the best, look no further than POWER THAW with AMC. POWER THAW is a powerful ice melter specifically formulated for High Performance melting in the industrial and commercial markets. Instantaneous melting and low temperature performance are the two distinct attributes that separate POWER THAW from the competition. Calcium chloride, Magnesium chloride, and AMC, the catalyst that ignites melting power, combine to give POWER THAW a fast acting thaw that is unmatched by any other blended product on the market. Whether the temperature is 20 above or 20 below, POWER THAW delivers an immediate, sustaining thaw that won't back down to any type of winter weather - ice, snow, or the treacherous combination of both. POWER THAW is an easy to see, blue-dyed product that allows for proper application. It takes the tedious, backbreaking work out of de-icing while optimizing safety to pedestrians. Keep your sidewalks, commercial entrances, parking lots and high traffic walkways clean with the blend that outperforms the competition again and again - POWER THAW.

#### LOW TEMPERATURE PERFORMANCE

Calcium chloride, Magnesium chloride and AMC combine to make POWER THAW fast and effective in any type of winter weather, even when the temperature drops to -20°F.

#### BLUE DYE

POWER THAW contains blue colored melting crystals to better indicate the spread pattern during application. The dye is harmless and soluble in water, therefore it will not stain the concrete or your hands.

#### MINIMIZE TRACKING

Power Thaw is coated with AMC, the catalyst that ignites melting power, which significantly enhances the speed of the product. Because Power Thaw works so quickly, the odds of product tracking in from foot traffic are greatly reduced.

#### SAFE TO THE OUTDOORS

POWER THAW is tough on winter snow and ice, but safe to vegetation and wildlife when used as directed.

#### SAFE ON CONCRETE & TREATED WOOD

POWER THAW does not contain any ingredients that will chemically alter or damage air-entrained quality concrete or treated wood when used as directed. The extended melting period allows more water to evaporate which helps prevent damage from freeze/thaw cycles.

#### NO HASSLE STORAGE & HANDLING

POWER THAW has an unlimited shelf-life and needs no special storage or handling.

EC Grow has successfully established a formula all its own to bring one of the fastest acting and safest liquid de-icers to the granular market.

#### MELT ICE FAST WITH POWER THAW AND AMC

POWER THAW is coated with AMC, the catalyst that ignites melting power, for instant melting action! AMC provides POWER THAW with the boost it needs to conquer any winter weather - even when temperatures drop to -20° F.

So for speed, low-temp melting power and long-lasting results, reach no further than POWER THAW Ice Melt with AMC!

#### DIRECTIONS:

Spread at the rate of about 1/4 cup per sq. yd. Leaves no messy white residue to coat sidewalks or to be tracked into buildings. Remove the slush immediately to prevent penetration of porous areas and cracks in the concrete, as continual thawing and freezing action can cause damage to poor quality concrete. Will not harm carpet or floors.
