

Side Oats Grama (Bouteloua curtipendula)

Technical Sheet

A hardy, rapidly emerging warm season grass bunch grass that spreads by short rhizomes; reproduces only by seed.

The bright orange and purple flowers of this short grass, which hang from only one side of the stem, help to make it the most attractive of all the grass species.

Used for surface mine revegetation, erosion control and as a warm season companion crop.

Has a high winter forage value for wildlife and livestock.

Characteristics

Sun Exposure: Full Sun

Height: 1 - 3 feet

Root Depth: 12" minimum

Blooms: July - September

Soil: Dry - Medium, Sand, Loam

Moderate drought tolerance

Moderate salt tolerance

Attracts birds

Deer resistant

Seeding Rate

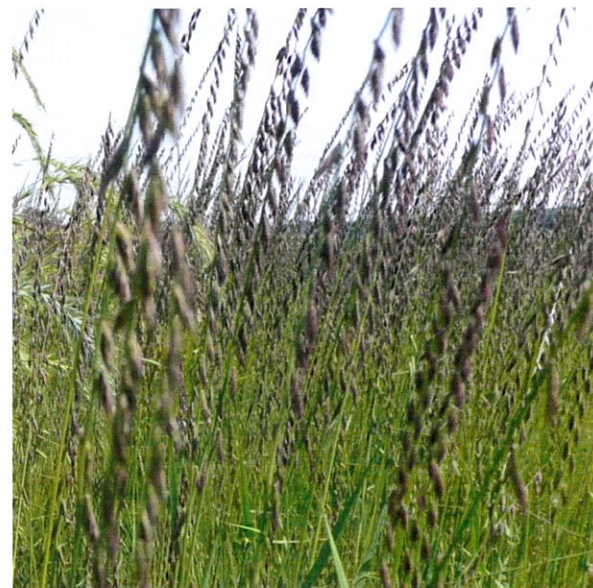

Solid stand of a single specie

Per 1,000 sq. ft.

0.25 lb.

Per Acre

10 lb.
