A rhizomatous, sod-forming cool season grass.

The plant grows from 20 inches to 3 feet tall with a minimum of a 12 inch root depth.

Does well in full sun with a moderate drought tolerance and a low salt tolerance.

Grows best in well-drained, fine textured soil. It is a very aggressive specie and will crowd out other plants.

Smooth brome can be used in pasture and hay mixtures which provides food for livestock. It will give an abundant yield.

Excellent grass for waterways but should be mixed with oats and seeded by drilling.

Blooms from June to August.
