

**Your Single Application Advantage**

Award® Turf Fertilizer is now available in the popular “Spread It & Forget It®”(SIFI) blends; same great products, same combination of Duration CR® urea, same great results. Now is the time to offer your customers a turfgrass solution that is not only more environmentally friendly but one that will also save time and money.

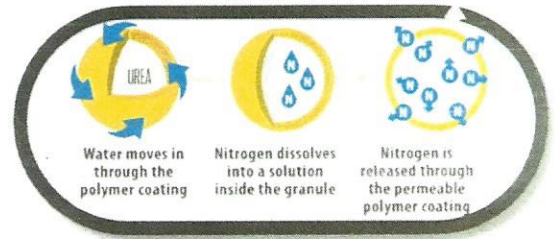

A number of state agencies have recognized the effects of nitrogen loss either through volatilization or leaching and are limiting applications of nitrogen per acre and/or are requiring a certain percentage of slow release. The controlled-release nitrogen technology of Duration CR® in the Award® “Spread It & Forget It®”(SIFI) blends is recognized as Enhanced Efficiency Fertilizer which reduces the potential loss to the environment through leaching or volatilization while maintaining turfgrass color and health.

Time is money. A single fertilizer application during the growing season allows crews to perform other on-site services or visit more properties per day. Less visits to a property makes you more efficient, productive and environmentally aware.

For best results and season-long feeding,  
 2-2.5 lb. Nitrogen / 1,000 sq.ft. is recommended.

**35-0-7** Award Turf Fertilizer, 95% Duration w/ 0.28% Barricade  
**35-0-7** Award Turf Fertilizer, 95% Duration w/ 0.10% Dimension  
**35-0-10** Award Turf Fertilizer, 95% Duration  
 Packaged: 50 lb. bag, 40 bags / pallet

Always refer to the actual product label for complete instructions and directions of use.

 Dimension is a registered trademark of The Dow Chemical Company or an affiliated company of Dow.

The key to the steady release of nutrition is an innovative polymer coating surrounding each granule. Because this release depends on temperature, it isn't affected by rainfall or irrigation, so there's no growth surges or nitrogen runoff from excessive moisture.

**Key Benefits**

- ➔ **Saves time which saves money \$\$\$!**
- ➔ **Reduced environmental impact from nitrogen loss due to volatilization and leaching.**
- ➔ **Less nitrogen loss to the environment.**
- ➔ **Durable membrane coating that withstands mowing and spreaders.**
- ➔ **Delivers nutrients for up to 6 months!**
- ➔ **Dust-free and consistent sizing.**
