

ERO-GUARD

MATERIALS DATA SHEET:

Product Name: EG-Tube Sock
Manufacturer: Ero-Guard, Inc.
Contact: Martenson Turf Products, Inc.

Physical Description:

- Composition: EG Tube Socks are composed of shredded logs and brush (2" minus).
Netting: Heavy duty black, UV Stabilized knitted fabric, tubular netting.
Configuration: Cylindrical with closed ends that are either hog ringed, zip tied or hand tied to ensure the integrity of the log.
Packaging: EG Tube Socks are rolled and tied, then placed on pallets.

Sock Diameter	Length	Weight	Density
8-9 in	20 ft	98 lbs	14.2 lbs/ft ³

Recommended Applications: EG Tube Socks are designed for perimeter control, inlet/outlet protection, slope interruption. They reduce hydraulic energy and filter sediment out of water, even when just laid on impervious surfaces without staking. These logs are flexible and conform to the ground which they are laid on and can be ordered in custom lengths if a job requires.

All measurements are based on product at time of manufacture.
