

BROADLEAF WEED CONTROL™

Award Turf Fertilizer with Viper has a combination of four active ingredients, together to control the most broadleaf weeds. The three active ingredients are a balanced formula of 2,4-D Ester, 2,4-D Acid, Mecoprop-p and Dicamba Acid which will attack both common and hard to control weeds directly to the root. Award Turf Fertilizer with Viper is a premium grade post-emergent herbicide and turf food product that is used to control more than 250 types of broadleaf weeds.

Award Turf Fertilizer with Viper is suggested to be applied to damp or with the morning dew. Water lightly.

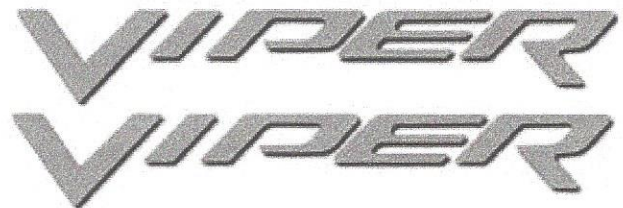

For the best results, mow one to two days before application. The Award Turf Fertilizer with Viper active ingredients need to be absorbed by susceptible plants

- Controls over 250 broadleaf weeds
- Kills to the root when properly applied
- Exclusive weed control formula

Viper also controls:

Sweet Clover, Beggartick, Carpetweed, Ground Ivy, Dandelion, Ironweed, Knotweed, Poison Ivy, Poison Oak, Ragweed, Thistle, Tumbleweed, White Clover, Witchweed, Yellow Rocket

Benefits of Viper™

The logo for Viper consists of the word "VIPER" written in a bold, italicized, sans-serif font. The letters are grey with a slight gradient and a shadow effect. The word "VIPER" is stacked on top of another identical "VIPER" word, creating a double-layered effect.The logo for Martenson Turf Products, Inc. features a large, stylized red letter "M" on the left. To the right of the "M", the word "Martenson" is written in a black, cursive script font. Below "Martenson", the words "Turf Products, Inc." are written in a black, bold, sans-serif font.
