### Get the **Game-On Advantage**

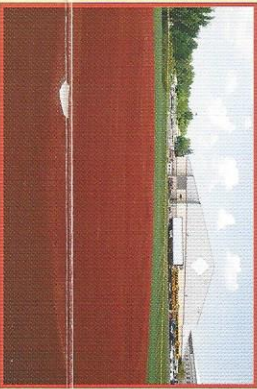

Game-On sets the new standard in sports field conditioning for skinned infields and sports turf. The result is a sports field conditioner that will stand up to hard play and weather conditions, transforming your field into one that is quick drying, free of hard spots and professional grade quality. Game-On is available in *Regular Soil Conditioner*, *Red Top Dressing*, and *Regular & Red Warning Track Blend*.

### Improved Playing Surface

The angular design and high absorption ability of Game-On promotes increased drainage and air circulation, which keeps your field from becoming rock hard and unplayable.

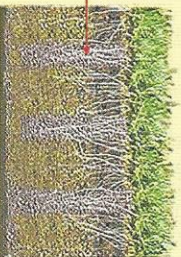

- Prevents athletic field problems such as soil compaction and hard spots, reducing the chance of a rain out.
- Reduces risk of player injuries by providing a durable, quick-drying turf that allows increased traction for players.
- Gives your field a professional look – Transform your infield to look like the pros, by applying *Game-On Red Infield top-dress*.

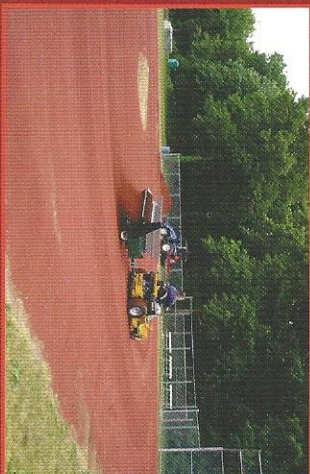

### Decreased Maintenance

Game-On will reduce the amount of time and money dedicated towards field maintenance by encouraging proper air movement, nutrient retention, and soil consistency.

- Angular design allows proper air movement within the soil, preventing soil compaction which leads to hard spots.
- Retains nutrients and moisture when wet – releases them during drying process to ensure a healthy, durable playing surface.
- Decreases drying time by promoting greater air flow within turf.

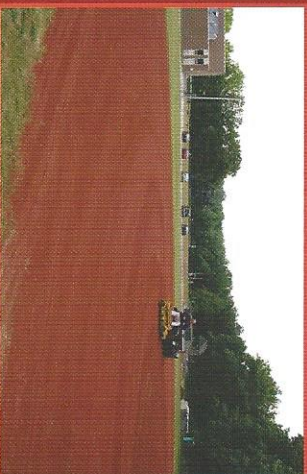

## Applications

1. Spread evenly 1 to 1.5 inches on the skinned infield surface.

2. Till Haydite into surface 3 to 4 inches in depth.

3. Drag and roll infield smooth.
